Allergy Manuals for Kinesiology

COMING SOON

Please register your interest by phone or email and we will contact you when available.

These manuals have been produced by Queensland Kinesiologist, Raneë Zeller. After completing many hours of courses on allergies, Raneë found that the information did not present adequately for Kinesiology use. Consequently she has gathered and presented all the broad allergy information for specific use by Kinesiologists, students and interested people. Much of the information can also be viewed as scan lists. These manuals fill a huge void in the practical, clinical part of the Kinesiology field. They will save people significant time & money in researching or attending non kinesiology courses to gather the same information.

Big Book of Allergies

This manual is a comprehensive reference for all things under the topic of allergies. For the Kinesiologist and student it is full of scan lists and topics that can be covered when allergy balancing/testing with clients. Initially it includes explanations of allergies types, medical viewpoints & medical & natural testing, but the bulk of the manual

is made up of listings of all possible allergens categorised into various topics with some definitions. For example: Foods, Health & Beauty, Coeliac, Nut Allergies, Salicylates, Dairy, Food Additives, Chemicals, Pests, Airborne Allergens etc. For ease of use the manuals is fitted with coloured tabs.

If you purchase the Big Book of Allergies above you need not buy this manual.

Power Up Your Brain \$33

The Neuroscience of Enlightenment
by David Perlmutter & Alberto Villoldo

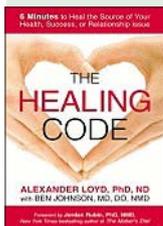

Don't let the style of title distract you from this book - it is brilliant. In the wake of new information coming out these days on the 'New Biology' and 'neuroplasticity' of the brain, this book, hot off of the press, ties up a lot of recent research and experience into a fascinating and very usable text. Two established authors combine their respective fields of neurophysiology and spirituality to produce a most practical, hands on and unique approach to improving brain function and quality of life. A lot of books go on about such things but this is the real deal in respect to joining cutting edge neuroscience and enlightenment for greater potential.

Holistic Anatomy \$33

An Integrative Guide to the Human Body
by Pip Waller

Holistic Anatomy presents an introduction to anatomy, physiology, and pathology that combines conventional concepts with wholistic principles based on spirituality, quantum physics, ecology, new biology and naturopathic medicinal systems. This makes the book quite unique - a fun, engaging & entirely relevant way to learn how the body functions. Great for those studying A & P or natural therapies, or for someone wishing to understand the workings of the human body from a wholistic perspective. Simple, yet informative, and cuts through the dry and boring presentation of other A & P texts.

The Healing Code \$33

Heal The Source of Your Issues
by Alex Lloyd & Ben Johnson

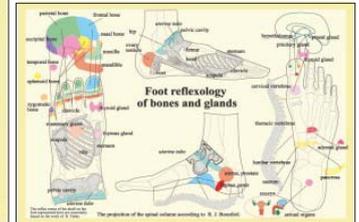

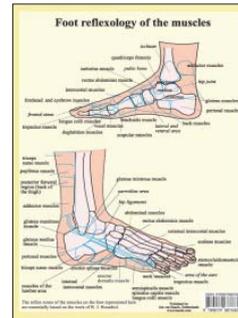

The Healing Code is your healing kit for life - to heal the issues you know about, and the ones you don't. In 2001, Dr. Alex Lloyd discovered how to activate a physical function built into the body that consistently and predictably removes the source of 95% of all illness and disease so that the neuro-immune system takes over its job of healing whatever is wrong with the body. His findings were validated by tests and by the thousands of people from all over the world who have used The Healing Codes system to heal virtually any physical, emotional, or relational issue, as well as realize breakthroughs in success.

His testing also revealed that there is a "Universal Healing Code" that will heal most issues for most people. In this book you will get that Universal Healing Code, which takes only minutes to do. The book also includes: The Seven Secrets of life, health, and prosperity The 10-second Instant Impact technique for defusing daily stress The Heart Issues Finder, the only test that identifies your source issues in a succinct personalized report.

Foot Reflexology - Bones, Glands, Muscles \$13

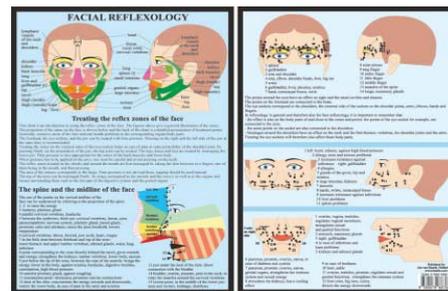

This chart is a trove for the advanced foot reflexologist. It contains little known material. The reflexology of the muscles on the foot is derived from material published by Bourdiola French neurologist. The reflexology of the skull in the toes had been described by

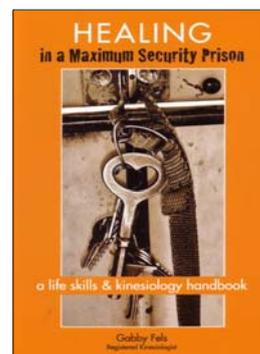

Fietta, a French naturopath. Furthermore a detailed reflexology of the skeleton and the glands on the foot.

Facial Reflexology \$13

Facial reflexology can be used like foot, hand or ear reflexology, to ease pain and generally to heal and support healing energies. One side of this chart gives the zones of the face & which areas of the body are represented in them. The reverse side gives many points with specific

indications which are generally in line with the material presented on the front. The whole contains a wealth of material for those into facial work and reflexology.

Healing In a Maximum Security Prison \$49

Kinesiologist Gabby Fels implemented a Kinesiology program in a prison in South Africa, which revolutionised the atmosphere to the extent where inmates themselves turned their energies to teaching the program to fellow prisoners. Gabby's book is not so much a story of the actual experience or events that took place in the prison, but a clear presentation of the concepts, practices & techniques used to achieve the end results. Ultimately it is a very in-depth and practical workbook that can be applied to any one's life as we are often 'prisoners' to the demands and stresses of modern living. It is very well set out and presented, and includes many photographs and diagrams.
