Allergy Manuals for Kinesiology

These manuals have been produced by Queensland Kinesiologist, Raneë Zeller. After completing many hours of courses on allergies, Raneë found that the information did not present adequately for Kinesiology use. Consequently she has gathered and presented all the broad allergy information for specific use by Kinesiologists, students and interested people. Much of the information can also be viewed as scan lists. These manuals fill a huge void in the practical, clinical part of the Kinesiology field, and will save people time & money in researching or attending non kinesiology courses to gather the same info.

Big Book of Allergies \$65

This manual is a comprehensive reference for all things under the topic of allergies. For the Kinesiologist and student it is full of scan lists and topics that can be covered when allergy balancing/testing with clients. Initially it includes explanations

of allergy types, medical viewpoints & medical & natural testing, but the bulk of the manual is made up of listings of all possible allergens categorised into various topics with some definitions. For example: Foods, Health & Beauty, Coeliac, Nut Allergies, Salicylates, Dairy, Food Additives, Chemicals, Pests, Airborne Allergens etc.

Free Downloads:

With your purchase of the Big Book of Allergies you can download free, any of 6 chapter/topic excerpts that you can share with friends or clients. These topics are:

- Diary Allergies
- Nut Allergies
- Coeliac & Grains
- Salicylate Allergies
- Vaccination
- Recreational Drugs

NOTE: these topics are covered in the Big Book of Allergies, but can be downloaded free with purchase of this book. However they are also available as separate manuals for \$18.50 each.

Kinesiology Tool Kit Allergy Edition \$33

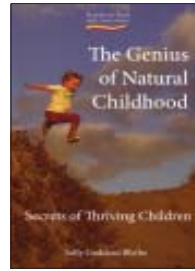

This manual is for the experienced or proficient Kinesiologist and is a clinical protocol, formatted to be used in conjunction with the Big Book of Allergies above, though it is possible to use it alone. It offers pretests, kinesiology questions

regarding specific allergies, correction strategies and sabotage checking. It may be of value to those looking for a methodology for using the Big Book of Allergies, but is not an absolute requirement.
