Spotlight On

Nutritional Medicine Books

By Dr. Igor Tabrizian

Dr. Tabrizian is a MD who practices solely in Nutritional Medicine. He has written many books on NM, and lectures extensively on the subject. He has presented at Kinesiology Conferences with great interest from delegates. His work has been valuable to many practitioners in collating modern scientific research in the NM area for ease of understanding and application.....

New

Nutritional Aspects of Depression & Mental Health \$28

This is Dr.T's eighth book and arrives at a pivotal time in mental health & wellbeing. As with his other books, this text interrogates the underlying causes of the common diseases of this modern era for layperson & practitioners alike. Written in a very user friendly style, & helped by many colourful pictures and diagrams. It initially covers why we get sick; looking at inflammation and chronic illness. But much of the book is about neurotransmitters; what they are, how we make them, how they are affected by the environment, how to mess with them, effects of low transmitters and more. It is here where the colourful and playful diagrams really do assist. There is also sections on: toxins and mental health, common scenarios, and the politics of mental health. **A5 sized, glossy hardcover book of 140 pages.**

Back In Print !

How to Read a 21st Century Hair Analysis \$88

Back in print in new glossy hard cover A4 edition of 280 pages.

Dr. T's revised book presents the reader with a logical description of cause and effect of nutrient surfeit and deficit and how these imbalances can be determined and treated

following HTMA. The use of diagrams plays a major part in demystifying the often complex biochemical processes behind the overt signs of distress that trace element and nutrient imbalance can create. The text follows the route of trace elements and nutrients through the body and shows how they are, or are not, assimilated.

How Emotions Are Made by Lisa Feldman Barrett \$33.00

The Secret Life of the Brain

When you feel anxious, angry, happy, or surprised, what's really going on inside you? Most scientists would agree that emotions come from specific parts of the brain, and that we feel them whenever they're triggered by the world around us. This understanding of emotion has been around since Aristotle. But what if it's wrong? In *How Your Emotions Are Made*, pioneering psychologist Lisa Feldman Barrett draws on the latest scientific evidence to reveal that our ideas about emotion are dramatically, even dangerously, out of date - and that we have been paying the price. Emotions don't exist objectively in nature, Barrett explains, and they aren't pre-programmed in our brains and bodies; rather, they are psychological experiences that each of us constructs based on our unique personal history, physiology and environment. Has serious implications individually and for society as a whole. A big read at 420 pages!

The Tapping Solution for Parents, Children & Teenagers by Nick Ortner \$25

How To Let Go Of Excessive Stress, Anxiety And Worry And Raise Happy, Healthy, Resilient Families

Nick Ortner, founder of The Tapping Solution, encourages readers to first take a look at their own stressors and worry as parents, reminding readers that self-care is vital to helping others. In the first section of the book, parents are guided on using the revolutionary technique known as EFT (Emotional Freedom Techniques) Tapping to release parental overwhelm, quiet worry, manage conflict and transform their experience of parenthood.

In the second section, Nick explores specific uses for Tapping with children, ranging from releasing negative emotions like anger, fear and phobias, sadness, grief, guilt, and shame, to overcoming specific challenges such as anxiety disorders, sleep, nightmares, performance anxiety, bullying, school jitters, divorce and much more.

The Healing Power of Illness by T. Dethlefsen & R. Dahlke MD \$35

Understand what your symptoms are telling you. When you see symptoms as bodily expressions of psychological or spiritual conflicts, you can use them as guides to heal. Every disease pattern expresses in a certain way, every organ or region of the body has a particular significance. Chapter by Chapter, piece by piece this book explores beautifully how the physical map of our health and wellbeing has its own psycho-spiritual counterpart.

Basics of Life by Marco Rado \$55

The Living Matrix & the 8 Extra Meridians

The manual for the course of the same name. Begins by discussing the Living Matrix - the continuous, dynamic and integrated network of all activities and components of the body. From there characteristics and functions of the 8 Extraordinary Meridians are covered as well the relationship to embryological development, teeth and muscle monitoring.

The BOL balancing procedure is given which is a template for working with any of the 8E meridian as highlighted in the rest of the manual, where all the balancing information for each is contained. This BOL procedure is very much based in TCM and represents a deeper understanding of the 8E Meridians for use with Kinesiology. **Spiral Bound A4 manual of 83 pages - full colour. NOTE: This is a course manual and learning & understanding the material fully is often best achieved in the class environment.**

Integrative Neurocardiology by Marco Rado \$47

The manual for the course of the same name. Introduces the Third Brain - the Cardiac or Heart Brain (the second brain being the gut). The heart plays a unique synchronising role in the body and is in continuous communication with the

Brain via multiple pathways (neurologically, biochemically, energetically, structurally and biophysically). It is a global conductor and also has a major place in TCM. The INC manual discusses the role of TCM in understanding the third brain and covers the procedures for working with the heart and the sense organs. It also outlines the procedures relating to each of the pathways mentioned above. Finally the manual covers the spiritual aspects/energies that reside in certain organs. **Spiral Bound A4 manual of 68 pages - full colour. NOTE: This is a course manual and learning & understanding the material fully is often best achieved in the class environment.**

The Spark in the Machine

by Dr Daniel Keown \$37

How the Science of Acupuncture Explains the Mysteries of Western Medicine

Why can salamanders grow new legs, and young children grow new finger tips, but adult humans can't regenerate?

What is the electricity that flows through the human body? Is it the same thing that the Chinese call Qi? If so, what does Chinese medicine know, that western medicine ignores?

Dan Keown's highly accessible, witty, and original book shows how western medicine validates the theories of Chinese medicine, and how Chinese medicine explains the mysteries of the body that western medicine largely ignores. He explains the generative force of embryology and how that so incredibly relates to the acupuncture system, as does the fascial system of the body.

This is a book of 'ah ha' moments as it takes one through what really makes the mystery of the meridians and acupuncture tick. Truly remarkable stuff.
