

## How To: Kinesiology ? SERIES

by Ranee Zeller

**A Series of 10  
A4 Manuals  
for use with  
Kinesiology on  
various topics**

### **BOOK 1: Formula** **\$47.00**

The Manual that puts the series together. Covers questioning skills, steps and the 'how to' formula - all which Ranee uses in her clinic & workshops. Then goes through the 'correction areas' with a chapter on each of Physical, Mental, Emotional, Spiritual & Nutritional aspects. These chapters have sub categories that list, point by point areas of involvement - over 80 pages of scan lists and material for access or referencing. This manual is highly recommended if buying any of the other books in the series, but not mandatory. May depend on level of experience in Kinesiology.

### **BOOK 2: Allergies** **\$42.00**

An extremely comprehensive list of allergens right across the board from foods to fashion to household. Over 100 pages and thousands of listed items under various categories and sub categories. Also includes a bonus section on Coelic, Milk Allergies, Salicylates, Nut Allergies for copyright free reproduction if helpful. A terrific resource for kinesiologists and anyone working with or interested in allergies.

### **BOOK 3: Relationships & Love** **\$25.00**

After over 20 years of research and hands-on experience assisting people in their own love healing journeys, Ranee has presented a manual on the topic for all to work with. This is a unique publication and is specifically aimed to use with Kinesiology. It begins by looking at personal beliefs around love, goal setting and the five love languages. The manual then goes through the Physical, Mental & Emotional aspects of a number of topics including: Affirmations, Quality Time, Gifts of Love, Acts of Service, Physical Touch. Following that is a scan list of relevant emotions, sabotages, sexual concerns and more more. The manual finishes with correction strategies, homework, ideas, and appendices on the Female and Male Reproductive Systems and the Anatomy of Orgasm. Quite a workbook ! 50 pages.

## Book of Human Emotions

by Tiffany Watt Smith **\$30.00 HC**

**An Encyclopedia of Feeling from  
Anger to Wanderlust**

This book is about the story of over 150 different emotions and how their context is important in describing their meaning. Emotions are perceived and performed in different ways and can be defined and understood through cultural context, for example.

Both the familiar emotions and rare emotions are covered. Each has its own story and history. This is not a book about technical definitions and categorising emotions, but glimpses into historical pasts and current cultural politics of emotions, shedding light on why we feel the way we do today.

The emotions are described as such in alphabetical order for easy reference. One can read the entries page after page, or just flick through until something catches the eye. A great hard cover book for the reference shelf, or for personal or clinical use.

## The Way of the Five Elements

by John Kirkwood **\$45 HC**

**Powerful acupoints for physical,  
emotional, and spiritual health**

Journeying through the seasons of the Five Elements, this book covers 52 prominent acupoints, their functions in the everyday world and their physical, emotional and spiritual associations. It includes 'images' that express the spirit of the season, and clear descriptions and photographs of the point locations.

A very practical and useful book on some of the most important acupoints - done so in a manner that many people often seek. Valuable & Highly Recommended.

## Mindful Parenting for ADHD

by Mark Bertin \$44

**A Guide to Cultivating Calm, Reducing Stress, and Helping Children Thrive**

Parents of children with ADHD face many unique daily challenges. Kids with ADHD are often inattentive, hyperactive, and impulsive and as a result, parents can become frustrated or stressed out. In this book a paediatrician presents a proven-effective program for helping both parents and kids with ADHD stay calm in the present moment. Parents will also learn how to let go of judgments, reasonably assess their child's strengths and weaknesses, lower stress levels for both themselves and their child, communicate effectively, and cultivate balance and harmony at home and at school.

## Special Interest

### Welcome to the Microbiome

by DeSalle & Perkins \$47 HC  
**Getting to Know the Trillions of Bacteria and other Microbes in, on and around you**

This thoroughly fascinating and absorbing book explores the paradigm shift from a focus on single pathogenic organisms to understanding communities of organisms living in and on us. It presents the historical perspective and describes recent scientific developments. The authors reveal the astounding diversity of species composition that exists across body parts and systems from the skin to the digestive system and across both individuals and groups. As with any complex ecosystem, the human microbiome is composed of species playing varied roles; when a critical species begins to decline, it alters the entire ecosystem.

### A Planet of Viruses

by Carl Zimmer \$27  
**A fascinating tour of a formidable hidden world**

An eye-opening look at the hidden world of viruses. This updated edition includes the stories of new outbreaks, such as Ebola, MERS, and chikungunya virus; new scientific discoveries, such as a hundred-million-year-old virus that infected the common ancestor of armadillos, elephants, and humans; and new findings that show why climate change may lead to even deadlier outbreaks. Zimmer's lucid explanations and fascinating stories demonstrate how deeply humans and viruses are intertwined. Viruses helped give rise to the first life-forms, are responsible for many of our most devastating diseases, and will continue to control our fate for centuries. An easy, captivating read for such a potentially complex topic. Highly Recommended.

### Neuroimmunity

by Michal Schwartz \$47 HC  
**A New Science that will Revolutionise how we Keep our Brains Healthy and Young**

In the past, the brain was considered an autonomous organ, self-contained and completely separate from the body's immune system. But over the past twenty years, neuroimmunologist Michal Schwartz, together with her research team, not only has overturned this misconception but has brought to light revolutionary new understandings of brain health and repair. Schwartz describes the connections between immune system and brain and how that relates to the future of nervous system related dysfunctions.
