from
Equilibrium

- **11 NEW TEST KITS SINCE LAST NEWSLETTER !**

See below & next page for details on these.

- **KIT UPDATES**

Have you all the vials that have been added to kits over the years? You can check with this newsletter - see Page 4. Also 2 new single vials available - Ross River Virus & Bonsoy - Page 5.

- **DISCOUNTS**

Some kits have been discounted till the 4th of May. See Page 5.

New Test Kits

If you would like to view the full contents of each kit please feel free to contact us and we can email you the details. Or you can view them at:

<http://www.kinesiologyshop.com/eqop3.htm>

- **Anaesthetic And Pain Test Kit**

Drugs used in anaesthesia (local, general, epidural) and also sometimes for pain including Codeine, Bupivacaine, Diamorphine, Diazepam, Fentanyl, Levobupivacaine, Ketamine and Procaine. **48 vials, \$139.00**

- **Bacteria Test Kit 2**

This kit includes 2 salmonella strains, Staphylococcus Saprophyticus (linked to cystitis), Propionibacterium Acnes (acne), Mycoplasma Fermentans (Gulf war syndrome) and two Vibrio strains (gastrointestinal illness from shellfish). It also includes bacteria that cause opportunistic infections when the immune system is compromised and bacteria that are part of or affect the normal human flora. **37 vials, \$105**

- **Candida Test Kit**

Although Candida albicans is the main strain that causes problems, some of the other strains are on the increase and can be implicated for some people. **13 vials, \$44.00**

- **Electro-Magnetic Test Kit**

Electrical and electro-magnetic frequencies, including mobile phones, television emissions, high voltage electricity, ELF's, etc. **14 vials, \$44.00**

- **Food: Pulses Test Kit**

16 beans/pulses plus soya bean (in two forms) plus a mixed vial containing all of them. **19 vials, \$55.00**

- **Nutrition Test Kit 2**

The energy patterns of substances commonly used as supplements, including DHA, SOD, quercetin, creatine, etc. **25 vials, \$67.00**

The vials in this kit contain the pure energy pattern of the substances without all the fillers, tableting agents and capsules that are there if you test supplements.

• Lyme Plus Test Kit

14 different babesia species, 24 different bartonella species, 21 different borrelia species, 2 ehrlichia. **61 vials, \$185**

Some of the species included have only ever been documented in animals, but because differentiation of the various species is time-consuming and not always carried out when people present with symptoms, these species have been included.

Cat Scratch Disease

Lymph nodes, especially those around the head, neck, and upper limbs, become swollen. Additionally, a person with CSD may experience fever, headache, fatigue, and a poor appetite.

Lyme Disease

Typical symptoms include fever, headache, fatigue, and a characteristic skin rash called erythema migrans. If left untreated, infection can spread to joints, the heart, and the nervous system.

Relapsing Fever

Relapsing or recurring episodes of fever, often accompanied by headache, muscle and joint aches and nausea.

• Pesticides Test Kit 2

More pesticides including some mixed vials giving you access to a lot of different pesticides and herbicides. Also the 4 pesticides that make up DDT. **25 vials, \$95.00**

This kit includes some banned pesticides. Many pesticides are found in fat tissue and human breast milk long after they have been banned because they are so persistent in the environment.

This kit includes 2,4-D / 2,4-Dichlorophenoxyacetic Acid, which is the most widely used herbicide in the world.

It also includes some of the pesticides which are included in products for home use.

In 2009 the U.S. Environmental Protection Agency (EPA) and the U.S. Department of Housing and Urban Development (HUD) collected samples with surface wipes from U.S. kitchen floors and found agricultural pesticides on many of these. Two pesticides in this kit occurred on many of these surfaces (Chlorpyrifos and Piperonyl Butoxide).

• Pesticides Test Kit 3

More pesticides, including some used in the home and garden. Many of these pesticides have been shown on occasions to exceed their standard for maximum residue level in food within the European Community. There is no reason to believe the results would be different in other countries. **25 vials, \$95.00**

A study published in 2006 (Diabetes Care, 29:1638–1644) indicated a link between blood serum levels of persistent organic pollutants (POPs) and diabetes. POPs are chemicals such as DDT, dioxins, PCBs and Chlordane, etc.) Individuals with elevated levels of POPs in their body were found to be up to 38 times more likely to be insulin resistant than individuals with low levels of these pollutants, though the study did not demonstrate a cause and effect relationship. As most exposure to POPs is through consumption of animal fats, study participants with high levels of serum POPs are also very likely to be consumers of high amounts of animal fats, and thus the consumption of the fats themselves, or other associated factors may be responsible for the observed increase in insulin resistance. Another possibility is that insulin resistance causes increased accumulation of POPs. Among study participants, obesity was associated with diabetes only in people who tested high for these pollutants. Chlordane is included in this test kit.

• Virus Test Kit 2

This kit includes Adenovirus (linked to respiratory illness), Coronavirus (the common cold), Human T-Lymphotropic Virus Type 1 and 2 (neurological illnesses and leukemia), Norovirus (gastroenteritis), four Parainfluenza strains, Rhinovirus (the common cold) and West Nile Virus. The kit also includes viruses that are of a concern from a biological warfare standpoint (e.g. SARS, Dengue and Ebola). **25 vials, \$69.00**

• Weight Test Kit

This kit draws together vials that are spread across other kits. The vials include hormones, enzymes, amino acids, etc. that affect metabolism, blood glucose levels, gastric emptying and appetite control. Vials include insulin, glycogen, T4, T3, reverse T3, leptin, neuropeptide Y, carnitine, etc. **38 vials, \$155.00**
(This kits will duplicate vials in the Biochemical, Hormone and Amino Acids test kits)

20 or more kits: 20% off Retail

Update Vials

Sometimes Kits are updated every now and then with the addition of vials. One can purchase vials that update kits at \$5.50 each (normal single vial purchase is \$10). The following are details on updated vials in the last several years.

Check the number of vials you have in your kit and you can work out what may be missing.

- **BACTERIA KIT 1 - Currently 56 Vials**

Bacteria Kit Additions 2003

2 additional vials were added to the Bacteria kit in 2003: Anthrax and MRSA.

Bacteria Kit Additions 2004

8 additional vials were added to the Bacteria kit in 2004: Bacillus Cereus, Clostridium Perfringens, Enterobacter Aerogenes, Klebsiella Pneumoniae, Micrococcus Luteus, Proteus Vulgaris, Salmonella Enteritidis and Streptococcus M.

Bacteria Kit Additions 2007

4 additional vials were added to the Bacteria kit in May 2007: Borrelia Vincentii, Clostridium Difficile, Mycobacterium Paratuberculosis and Neisseria Catarrhalis.

- **CHEMICAL & INHALANTS KIT - Currently 39 Vials**

Chemical & Inhalant Kit Additions

2 additional vials were added to the Chemical and Inhalant kit some years ago: Colophony and Triphenyl Phosphate.

- **DENTAL KIT - Currently 50 Vials**

Dental Kit Additions 2003

3 additional vials were added to the dental kit in 2003: GC Fuji Bond LC, GC Fuji IX GP and Tetric Cream.

Dental Kit Additions 2004

9 additional vials were added to the dental kit in 2004: Belle Glass, Cercon, Cercon S, Cerpress, Duceram Plus, Herculite, Maxi Bond Metal, Presciano, Solo Bond.

- **FUNGUS KIT 1 - Currently 30 Vials**

Fungus Kit Additions 2003

3 additional vials were added to the Fungus 1 kit in 2003: Candida Glabrata, Candida Krusei and Chlamydia Pneumoniae.

Fungus Kit Additions 2004

6 additional vials were added to the Fungus 1 kit in 2004: Cryptosporidium, Entamoeba Coli Cysts, Iodamoeba Butschlii Trophozoites, Iodamoeba Butschlii Cysts, Leishmania Tropica and Pneumocystis Carnii.

- **RECREATIONAL DRUG KIT - Currently 14 Vials**

Recreational Drugs Kit Additions 2003

2 additional vials were added to the Recreational Drugs kit in about 2003: Cotinine and Nicotine.

- **VACCINATION KIT - Currently 31 Vials**

Vaccination Kit Addition 2004

2 additional vials were added to the Vaccination kit some years ago: Meningitis C vaccination and 5-in-1 vaccine (whooping cough, diphtheria, bacterial meningitis, tetanus and polio).

Vaccination Kit Addition 2007

1 additional vial was added to the Vaccination kit in May 2007: Pneumococcal/Prevenar vaccination.

Vaccination Kit Addition 2008

2 additional vials were added to the Vaccination kit in 2008: HPV Vaccines (Cervical Cancer Vaccination) - Cervarix and Gardasil.

Vaccination Kit Additions 2010

1 additional vial was added: H1N1 / Swine Flu vaccination vial.

*** Vaccination Kit: Influenza Vaccination Vial (Past Years)**

This is the generic influenza vaccination vial - it comes as vial #10 when one purchases the full Vaccination kit. However it is updated once a year to include the most recent influenza vaccination every November/December. The current one covers: 1992 & then 1994 to 2010/2011. In recent years the vial label has been altered each year, so that you can always check you have the latest version.

*** Influenza Vaccination (Current Year Only)**

This vial is available if you wish only the latest annual Influenza Vaccination. It is available each year around November/December for that year's Influenza Vaccination only. However 2010/2011 is same as 2009/10.

- **VIRUS KIT - Currently 21 Vials**

Virus Kit Addition 2007 21 vials

1 additional vial was added to the Virus kit in 2007: Parvovirus.

New Single Vials

Sometimes individual vials become available which may or may not enter into a kit at a later date. Recently 2 became available. These vials are \$7 each.

1. Ross River Virus
2. Bonsoy

Individual Vials from Kits

Individual vials can be purchased from kits. Generally this can be an expensive way to buy vials but is a good option if one only wants a select few from a kit. They are \$10 each or \$8 each for 5 or more.

Update Vials (vials that update kits or added to kits over time) are \$5.50 each. See list of update vials previous page

OTHER TOOLS:

Sound Healing Tuning Forks

The Ohm Tuning Forks are manufactured to the sound frequency of the Universal Ohm vibration and overtones. The body with its natural intelligence is able to assimilate and resonate with the Ohm vibrations and utilise its healing properties for balance and reconnection. The sound vibration of Ohm is restful and has a calming and healing effect as it grounds and centers. Considered the primordial sound from which all other sounds emanate, the Ohm tone is an excellent tool for beginning & seasoned Sound Healers.

The quality standard of the Ohm Tuning Forks is very high. They are made with a space & medical grade aluminium alloy and are precision tuned to within 0.5% of their indicated frequency.

There are six different Ohm Sound Healing Tuning Forks. The classic or main Ohm resonance fork is the Mid Ohm Fork of 136.10 Hz frequency. The other 5 forks are higher or lower octaves either side of the Mid Ohm. Three of the forks are weighted to allow the vibration to descend into the physical body when the base of the fork makes contact with the body. The physical feeling is quite pronounced & exquisite. The effects are profound. The forks are available separately or in various sets. Book, DVD, Musical CD's and practitioners aids also available.
