New Test Kits

● Salicylates Test Kit

Salicylates are derivatives of salicylic acid that occur naturally in plants and serve to protect the plants against diseases, insects, fungi, and harmful bacteria. Synthetic salicylates can also be found in many medications, perfumes and preservatives. Both natural and synthetic salicylates can cause health problems in anyone

when consumed in large doses. But for those who are salicylate intolerant, even small doses of salicylate can cause adverse reactions. **10 vials, \$39**

● Emotional States Composite Test Kit

A kit of ten primary or broad-spectrum emotions or states of being. Since there are thousands of different emotions, hundreds of them have been distilled and categorised by kinesiology testing and the study of anthropological and psychological research, into these basic 10 vials. Contact us for

the full list. **10 vials, \$39**

● Immunoglobulin Test Kit

Immunoglobulin (Ig), also known as an antibody (Ab), is a large Y-shaped protein produced by B-cells that is used by the immune system to identify and neutralize foreign objects such as bacteria and viruses. These are five immunoglobulin or antibodies

involved in the immune system. **5 vials, \$27**

● Lectins Test Kit

Lectins are found in plants and milk. They are sticky and so interact with the lining of the throat and the digestive tract when we eat them. Because we don't digest lectins, we often produce antibodies to them, potentially creating unwanted reactions. Lectins may also be responsible in part for 'leaky gut

syndrome'. **7 vials, \$33**

● Viruses Test Kit: Number 3

Another 21 viruses including Hanta virus, Human Herpes Virus 6, Simian Virus 40, etc. 21 vials suitable for energy work by kinesiologists, homeopaths, etc.

21 vials, \$69

● Food Kit G

Focussing on Asian cuisine, including seaweeds, fruits and vegetables. Very suitable if one has lots of Asian clients. It's also useful if one wants to extend the range of foods for those on a restricted diet. Also includes some superfoods.

50 vials, \$155

● Vertebral (PH 7B Test Kit)

In human anatomy, the vertebral column usually consists of 24 articulating vertebrae, and nine fused vertebrae in the sacrum and the coccyx. This kit consists of 34 vials to include the 5th coccygeal vertebra which is occasionally present. **34 vials, \$120**

● Body Biochemical Test Kit: Number 6

The 6th of the Body Biochemical Test Kits, containing more hormones, cytokines, including DHEA, Gastrin, Peptide YY, Fibroblast Growth Factors, etc. 25 vials for AK Practitioners, Bioresonance Practitioners, NAET, etc. **25 vials, \$99**
